```
                within session from the intro cutscene, this drops the player back at
the shelter (SAFE_ZONE) with the evidence phase already active.

State setup mirrors what the "blast_done" card choice does in _choose_card():
  - Stage = STAGE_EVIDENCE
  - Player at SAFE_ZONE (the concrete shelter)
  [illegible]
  - Sniper suppressed/removed
  - All clues marked as found
  - Cleanup team spawned (wave 0)
  - Persistent fire zones created (via _explode_tanker)
  - Player HP restored to 80 (survived the blast with debris scrape)
  - Checkpoint flag re-set (so subsequent deaths also respawn here)
"""
player = start_mission(practice_time=practice_time)
